

Template pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of regulation (EU) 2019/2088 and Article 5, first paragraph 1, of Regulation (EU) 2020/852

“Sustainable investment” means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Danske Invest Kehittyvät Markkinat Kestävä Tavoite

Legal entity identifier (LEI): 743700WSYDCSYRDEDS25

Sustainable investment objective

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of sustainable investments with an environmental objective: 20%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of sustainable investments with a social objective: 30%

It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but will not make any sustainable investments

What is the sustainable investment objective of this financial product?

The fund's sustainable investment objective is to contribute to the United Nations Sustainable Development Goals (the “UN SDGs”). Contributing directly to environmental goals of the EU Taxonomy is not part of the fund's investment strategy, as the fund has not defined a minimum commitment for such investments.

The UN SDGs consist of 17 goals including underlying targets that contribute to environmental and social objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund's sustainable investments contribute to these goals by investing in listed securities issued by issuers generating more than 50% of their revenue from products and/or services that contribute positively to one or

more of the UN SDGs. This is screened using a model (the “SDG Model”) developed for the Danske Bank Group and applied to sustainable investments in this asset class. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments.

The fund does not commit to a minimum contribution to specific UN SDGs and does not commit to contributing to each of the UN SDGs. Accordingly, how and to which extent a sustainable investment contributes to the UN SDGs may vary for the sustainable investments in the fund.

As an integral part of attaining its sustainable investment objective, the fund also promotes:

- Inclusions: The fund applies inclusion criteria relating to “sound sustainability practices” and “sound environmental stewardship”. The inclusion criteria are managed through the inclusion and weighting of issuers demonstrating a sound management of environmental, social and governance related aspects. These inclusion criteria and how they are attained are described in “What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?” and “What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?”.
- Exclusions: The fund applies exclusions relating to the conduct of issuers and/or activities in specific sectors. These exclusions and how they are attained are described in “What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product” and “What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?”.
- Consideration of investments’ principal adverse impacts on sustainability factors: The fund considers the investments’ principal adverse impacts on sustainability factors. How the fund considers the principal adverse impacts on sustainability factors is described in “Does this financial product consider principal adverse impacts on sustainability factors?”.
- Active ownership: The fund complies with the Active Ownership Policy of Danske Invest Fund Management Ltd and is covered by the scope of the policy in terms of engagement. Thus, the management of the fund involves an obligation to ensure active ownership in accordance with the conditions and criteria set out in the policy.

The fund does not apply a specific index as reference benchmark to attain its sustainable investment objective.

What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?

The fund applies the following sustainability indicators to attain its sustainable investment objective (see also “What are the binding elements used to select the investments to attain the sustainable investment objective”):

Sustainable Investments

The sustainable objective is attained through the screening criteria of Danske Bank’s methodology for identifying sustainable investments that contribute positively to the sustainable investment objective of the fund. The attainment of these goals is measured and reported through the weighted share of investments identified as sustainable on the basis of the criteria defined for the relevant asset class. Investing in listed securities, the sustainable investment criteria applicable to the fund is determined through the SDG Model.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Inclusions

The inclusion of “sound sustainability practices” is measured through the weighted ESG score of the portfolio as based on an internally developed scoring model. The inclusion of “sound environmental stewardship” is measured through the weighted carbon risk rating score of the portfolio as based on a rating score sourced from ISS ESG.

Exclusions

The fund’s exclusions are attained through the indicators, thresholds and definitions set out in the Exclusion Instruction of Danske Invest Fund Management Ltd. The Exclusion Instruction forms the basis of continuous screening and maintenance of exclusion lists for the fund, the impact of which is reported annually.

The fund excludes:

- Issuers that are not, based on a screening conducted by Danske Bank A/S, considered to be in compliance with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards and good governance principles. The fund is further subject to an extended thematic screening (Enhanced Sustainability Standards Plus) on involvement in sustainability related controversies, -practices, or other activities considered unacceptable in relation to certain norms and applies exclusions tied to the PAI-Indicators as defined below.
- Issuers with activities relating to tar sands, thermal coal, peat-fired power generation, fossil fuels, military equipment, commercial gambling, alcohol, tobacco, where such activity constitutes more than 5% of the issuer’s revenue. *On the basis of an assessment of the transition plan, an issuer may be exempted from an exclusion under the fossil fuel exclusion criteria even though revenue associated with the activity exceeds 5%, provided that the principle of not causing significant harm to any environmental or social objective is observed.*
- Issuers covered by an exclusion lists resembling those exclusions that are applied for Paris Aligned Benchmarks as defined in Article 12 (1)(a)-(g) in the Delegated Regulation to the Benchmark Regulation, Regulation (EU) 2020/1818 (PAB Exclusions).
- Issuers with activities relating to pornography, where such activity constitutes more than 1% of the issuer’s revenue.
- Issuers with activities relating to controversial weapons.

Principal Adverse Impacts

The principal adverse impacts on sustainability factors are measured against mandatory and voluntary indicators listed in Danske Invest Fund Management Ltd’s statement on principal adverse impacts of investment decisions on sustainability factors that are relevant to the asset classes in which the fund is invested (“PAI Indicators”).

Active Ownership

Active ownership is for engagements measured by the number of registered dialogues with issuers in the fund. This also applies to engagements with issuers in the portfolio registered by Danske Bank or sub-delegated managers, which have not necessarily taken place in connection with the direct management of the fund.

Voting is measured on the number of proposals voted on.

Further details on the fund's indicators are available in the document “Sustainability-related disclosure”, available at https://www.danskeinvest.fi/page/vastuulliset_sijoitukset_tietoa under the heading “Sustainability-related disclosures for our funds”.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How do the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?

"Do no significant harm" is safeguarded through the fund's general exclusion criteria and through the methodology applied in the identification of sustainable investments as described in more detail in "How have the indicators for adverse impacts on sustainability factors been taken into account?".

How have the indicators for adverse impacts on sustainability factors been taken into account?

Based on the indicators on adverse impacts on sustainability factors, the SDG Model determines whether the issuer, through its operations, has an adverse impact on a the UN SDGs. Further, issuers with product lines or services that are considered to contribute negatively to environmental or social objectives are not considered to meet the "do no significant harm" requirement, when these activities represent more than 5% of revenue.

"Do no significant harm" is also addressed through thresholds on the PAI-indicators relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters of investee companies. Even if an investment has a positive contribution to an environmental or social objective and is generally permitted according to the fund's exclusion criteria, the investment must comply with the current thresholds determined for the fund to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be conceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of "no significant harm".

To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available under the heading "Sustainability-Related Disclosures for our funds" at:

https://www.danskeinvest.fi/page/vastuulliset_sijoitukset_tietoa

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The fund applies exclusions relating to the conduct and/or activities of issuers in different sectors (see "What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?"). Exclusions are among others based on an enhanced sustainability screening, which screens issuers for compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other things. Accordingly, the fund does not invest in issuers that are deemed to violate these guidelines and principles as defined through this screening.

Does this financial product consider principal adverse impacts on sustainability factors?

- ✓ Yes, the fund takes account of principal adverse impacts on sustainability factors. This consideration is safeguarded through the fund's exclusions. Moreover, the fund takes account of investments' adverse impact on sustainability factors through the criteria applied for its sustainable investments and by monitoring the performance of the portfolio and prioritising active ownership activities.

The fund's exclusions overlap with certain themes covered by the PAI-Indicators, including, for example, the environmental indicators and indicators relating to controversial weapons and international human rights conventions, such as the UN Global Compact.

As the fund makes sustainable investments, additional constraints apply to how principal adverse impacts are addressed in order to ensure that the fund's sustainable investments do not cause any significant harm to a social or an environmental objective (see also "How do the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?").

In respect of active ownership, the fund is covered by the Active Ownership Policy of Danske Invest Fund Management Ltd, which is based on frameworks defined for the Danske Bank Group. The policy and underlying instructions safeguard, to the extent relevant and depending on the asset class, the consideration for voting at general meetings and engaging directly with issuers.

Information on the principal adverse impacts of the fund's investments on sustainability factors is provided in the fund's annual report.

☐ No

What investment strategy does this financial product follow?

Information on the fund's general investment strategy is provided in "Fund Descriptions" in the prospectus.

The fund invests in sustainable investments that support its sustainable investment objective. In line with its strategy, issuers with a positive and measurable contribution to one or more of the SDGs are selected as sustainable investments according to the SDG Model.

The SDG Model analyses the products and/or services of the issuers. The SDG Model further analyses operational aspects, i.e. how the issuers make their products or provide their services.

The fund's investment strategy ensures that the "do no significant harm" principle is considered through exclusions, the SDG Model and thresholds for the PAI Indicators. Moreover, the fund may practise active ownership by engaging with issuers on significant sustainability topics, including suggestions to help meet the fund's sustainable investment objective, and by voting on environmental and/or social proposals in accordance with the Active Ownership Policy of Danske Invest Fund Management Ltd.

The sustainable investment objective, as supplemented by other promoted environmental and/or social characteristics as well as issuers' good governance practices, is integrated in the investment strategy on a continuous basis through a commitment to systematically identify and address sustainability factors embedded in the investment and/or investment selection process. By this, the sustainable investment objective, environmental and/or social characteristics as well as issuers' good governance practices may influence a decision to either buy or increase weighting, hold or maintain weighting, sell or decrease weighting of an investment, in order to attain the fund's characteristics.

Should an investment no longer meet the sustainable investment eligibility criteria for the fund's portfolio due to for instance a changed assessment of sustainability impacts, it will be divested as soon as practicably possible. The ability to divest may in exceptional cases be impacted by external factors including, but not limited to, geopolitical events, low market liquidity and corporate actions. In these cases, the fund can be forced to hold on to "Not sustainable" investments.

The extent to which the fund's sustainable investment objective and other environmental and/or social characteristics are attained through the investment strategy is monitored on a regular basis and is reported in the fund's annual report.

What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?

Sustainable Investments: The fund invests solely in sustainable investments that contribute to its environmental and/or social objective. The fund may to a limited extent make investments that are considered non-sustainable, provided such investments are used for hedging purposes and/or relate to cash funds held for liquidity purposes. For its sustainable investments an issuer must be assessed as sustainable according to the SDG Model.

"Sound sustainability practices": Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 50. Individual companies may score below 50 as long as the total portfolio of the fund scores 50 or above in respect to the ESG score.

"Sound environmental stewardship": Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a carbon risk rating score of 50. Individual companies may score below 50 as long as

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

the total portfolio of the fund scores 50 or above in respect to the carbon risk rating score.

Exclusions: The fund cannot invest in and/or remain invested in issuers featuring on exclusion lists for exclusions that apply to the fund. Fiduciary duties owed by to its investors may in extraordinary circumstances, including in a low market liquidity environment, prevent the fund from divesting an excluded issuer. Any such excluded holding of the fund will be communicated through publicly available exclusion lists.

Principal adverse impacts on sustainability factors: Principal adverse impacts on sustainability factors are considered and addressed as an integral part of managing the binding elements of the fund's environmental and social characteristics (see "Does this financial product consider principal adverse impacts on sustainability factors?").

Active ownership: In terms of active ownership, the Active Ownership Policy of Danske Invest Fund Management Ltd, including Engagement Guidelines, determines when engagement should be initiated with issuers on significant sustainability topics. Shareholder proposals on environmental and/or social matters are handled in accordance with the Active Ownership Policy of Danske Invest Fund Management Ltd, including Voting Guidelines.

What is the policy to assess good governance practices of the investee companies?

The Responsible Investment Policy of Danske Invest Fund Management Ltd provides the basis for assessing and addressing the issuers' good governance practices. In accordance with the framework, the fund considers good governance practices through the use of exclusions tied to a good governance screening performed by Danske Bank on behalf of Danske Invest Fund Management Ltd.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance. The screening excludes issuers deemed to fail to comply with international governance principles following from the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and ILO Conventions. In order to safeguard the consideration for good governance practices, the screening further involves the use of defined criteria for sound management structures, employee relations, remuneration of staff and tax compliance. Failure to meet these criteria is seen as an indication of an overall lack of adherence to good governance criteria. Such issuers are therefore excluded for the fund.

What is the asset allocation and the minimum share of sustainable investments?

For investments made for investment purposes the fund invests solely in sustainable investments in support of its sustainable investment objective. As the fund reserves the opportunity of making other investments in cash (for liquidity purposes) and derivatives (for hedging), the expected minimum share of sustainable investments in the fund is 80%. The fund's sustainable investments consist of environmentally sustainable investments with a minimum commitment to invest 20% or more in these investments and socially sustainable investments with a minimum commitment to invest 30% or more in these investments.

The remaining part of the fund's sustainable investments can be freely allocated between environmental investments or investments supporting a social objective to ensure an appropriate portfolio composition.

The fund does not commit to a minimum share of investments targeting economic activities that qualify as environmentally sustainable under the EU Taxonomy.

The fund's actual exposure to sustainable investments will either correspond to or exceed the minimum allocation, subject to sector-specific requirements that may, in exceptional circumstances, require the fund to exceed the 20% bucket for non-sustainable investments to allow for redemption of investors, etc. Average minimum allocations are reported in the fund's annual report.

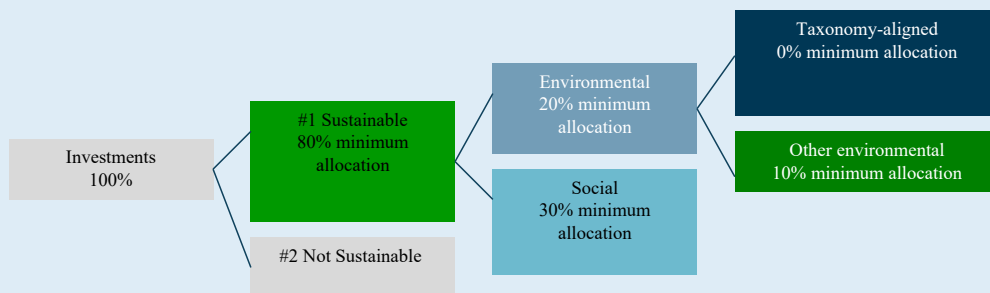

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy
- operational expenditure (OpEx) reflecting green operational activities of investee companies

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

How does the use of derivatives contribute to the attainment the sustainable investment objective?

The fund does not use derivatives to attain its sustainable investment objective.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The minimum extent to which the fund invests in sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.

The actual share of the fund's Taxonomy-aligned investments, if any, are reported in the the fund's annual report. The Taxonomy alignment calculation applies turnover as key indicator both in respect of financial and non-financial issuers.

The calculation is based on reported data from issuers provided for the fund through external data providers. In the absence of such reporting, equivalent information can under certain circumstances be obtained from issuers or external data providers.

The compliance of Taxonomy-aligned investments with the criteria under article 3 of the EU Taxonomy will not be subject to assurance by auditors or any third party.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy*?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- ☐ Yes
- ☐ In fossil gas
- ☐ In nuclear energy
- ☒ No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

The graph represents 100% of the total investments.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

What is the minimum share of investments in transitional and enabling activities?

The minimum share of investments in transitional activities is 0%. Similarly, the minimum share of investments in enabling activities is 0%.

The actual share of these activities is reported as part of the fund’s annual reporting.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The fund commits to a minimum share of 10% for those investments. The actual share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy within the given reference period shall be reported in the fund’s annual report.

The reason why the fund invests in sustainable investment with an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeted by the fund going beyond the scope of the EU Taxonomy.

“The minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy” are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with a social objective?

The minimum share of sustainable investments with a social objective in the fund is 30%. The actual level is reported in the fund's annual report.

What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?

The fund may invest in non-sustainable investments, provided such non-sustainable investments are used for hedging purposes or relate to cash funds held as ancillary liquidity.

Given the nature of the exposure obtained through such instruments, the fund does not apply minimum environmental or social safeguards for this purpose. The reason is that such investments will not directly support or finance activities (including economic activities) that may potentially conflict with minimum environmental or social safeguards.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

The fund does not apply a specific index as reference benchmark to attain its sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they

Where can I find more product specific information online?
